Kiribati – Nationally Determined Contributions (NDC)

MR CHOI YEETING

NATIONAL CLIMATE CHANGE COORDINATOR & SENIOR POLICY ADVISOR (CLIMATE CHANGE)

STRATEGIC NATIONAL POLICY DIVISION – CLIMATE CHANGE UNIT

OFFICE OF TE BERETITENTI (OB) – KIRIBATI

Overview

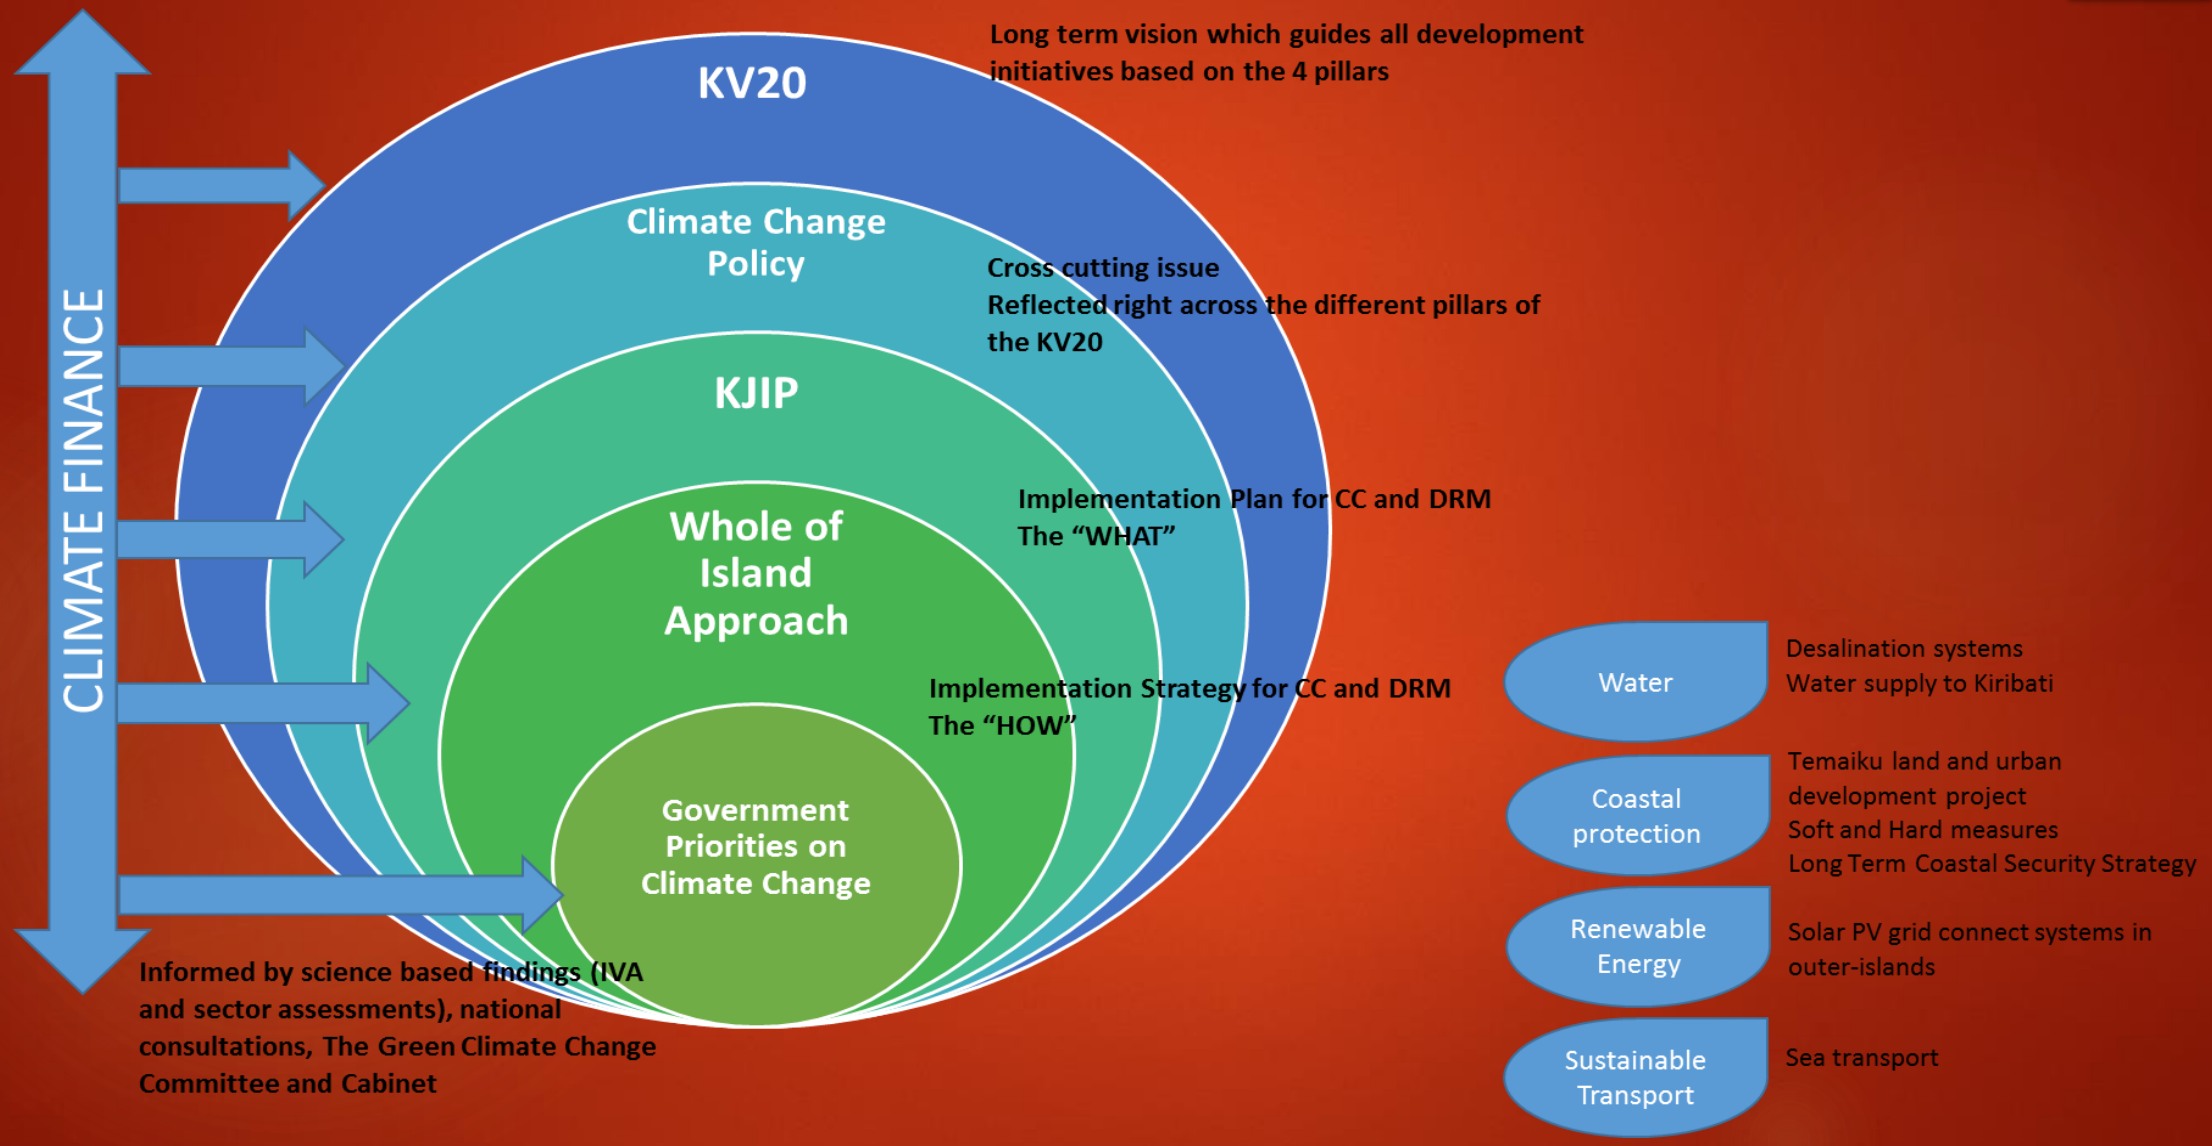
1. Background
2. Policies, plans and strategies
   1. Climate Change Policy
   2. National Priorities and the KV20
   3. Kiribati Joint Implementation Plan (CC and DRM)
   4. Nationally Determined Contributions
3. Whole of Island Approach (WOIA)

Policies, Plans and Strategies

Climate Change Policy

- Launched in June 2018
- Entails the direction of this administration ("Strengthening resilience and adaptive capacity of Kiribati (land and people")).
- Forward looking document
- No specific timeline : "living document"
- Highlights all vulnerabilities of Kiribati in light of climate change impacts
- Provides broad strategies to address these vulnerabilities
- Aligns to the KV20, KDP, SDG and Paris Agreement

National priorities and the KV20



1.2. Kiribati Joint Implementation Plan (CC and DRM)

- NAP for Kiribati _ NATIONAL
- 9 year plan
- Integrated approach (CC and DRM and Development)
- 12 strategies (Food security, Land Management, Water Security, Coastal protection)
- Informed by scientific findings and studies

- Provides the enabling environment for Human settlements, communities and villages, resilience and adaptation.

Nationally Determined Contributions (NDC)

- Mitigation contributions / targets

13.7% by 2025 and **12.8% by 2030** compared to a BaU projection (Unconditional)

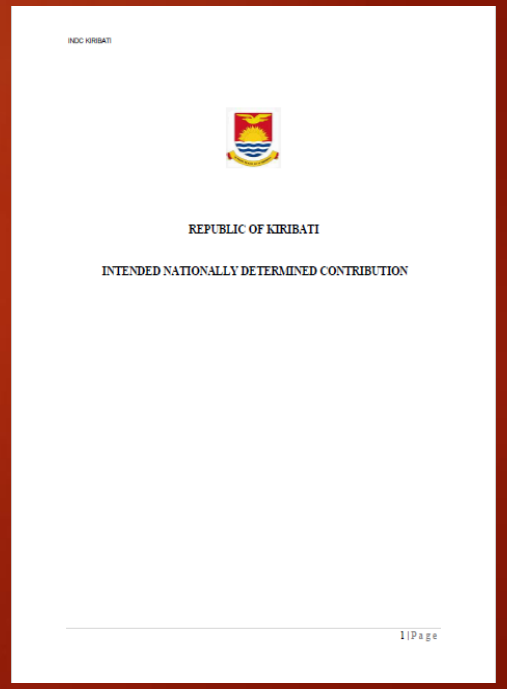
With appropriate international assistance, Kiribati can reduce its emissions by more than 60% (61.8%) by 2030. (Conditional)

Energy sector: Power (approximately 48%) Transport (52%) Maritime and coastal

Current (2014) greenhouse gas emissions from Kiribati are approximately 63,000tCO_2e/year. This is extremely small: representing approximately just 0.0002% of global emissions.

- Greenhouse gas emissions are the result of combustion of imported fossil fuels in the energy sector for:

- Electricity generation;
- Sea transport;
- Land transport;
- Kerosene for lighting on outer islands; and
- LPG and kerosene for cooking.



INDC KIRIBATI

REPUBLIC OF KIRIBATI

INTENDED NATIONALLY DETERMINED CONTRIBUTION

1 | Page

NDC contd.

- Adaptation is a key component within our NDC
- KIER as the Implementation Strategy for the NDCs
- Have been further talks on enhancing our NDCs
- Depicts efforts at the national to reduce carbon emissions: green growth, renewable energy, pollution control
- Links closely to the Paris Agreement
- Adaptation featured within our NDC (National Priority – Adaptation)
- Demonstrates our political will and level of contribution to global efforts
- Opportunity in terms of technology transfer, capacity building and climate finance resources

National priorities and the KV20
