

Powerlite Fiji Pte Limited

- Thank you - The Private Financing Advisory Network (PFAN) in cooperation with The Pacific Centre of Renewable Energy & Energy Efficiency (PCREEE) and The Fiji Rural Electrification Fund (FREF) for allowing Powerlite Fiji Pte Limited to be part of this Network and giving us the opportunity to present our company in this Forum.
- Powerlite Fiji Pte Limited is a private locally owned company, started our operation into Fiji Market in the year 2003.
- Powerlite Fiji started its operation focusing on Energy Sector, providing engineered solutions to consumer power demand. Our target customers are from the outer islands and interiors of the main islands of Fiji.
- We as a company started with Rural Electrification Projects, supply of costumed built Generators, installation and maintenance of the Power Generating sets in the year 2003.
- With the market demand for cleaner energy, we ventured into Renewable Energy systems, such as Solar Home Systems, Solar Hybrid Systems and Solar Grid and mini Grid Systems.
- Powerlite Fiji Pte Limited also has a been an active member in the construction industry.

Powerlite Fiji Pte Limited – Experience & Track Records

- Powerlite Fiji Pte Limited has always served the very remote consumers based in the interior of the mainland and the maritime islands.
- We have a team of qualified and experience personnel who have always worked to achieve the unachievable.
- Powerlite is a Licensed Electrical Contractor for Energy Fiji Limited, member with SEIAPI, registered construction company under the Construction Industry Council.
- Powerlite Fiji Pte Limited head office is based in Suva, Fiji and a branch in Vanua Levu Labasa, with a team of 20 permanents staff including management, technical and logistical staff.
- In the past 17years of our existence, we have successfully installed some over 6000 x 270 – 300Watts Solar Home Systems, Solar Hybrid Systems ranging from 1.1 to 10KW, Solar Water Pumping System from 200watts to 7KWatts.
- Our services are not Limited to Design, supply and installation of Solar Power System for domestic use but we have also provided our services to the telecommunication industry, supply and installing Power systems for their remote repeater site through generator, solar and hybrid systems.

Powerlite Fiji Pte Limited – Projects / Activity

- Powerlite Fiji Pte Limited has been providing EPC Solution on the projects implemented by the Government of Fiji.
- These projects are funded by the Government of Fiji and limited to their design. *(Case Study: Powerlite Fiji developed Solar Home System Type II for the Government of Fiji through the PIFS grant - Japanese AID)*
- The present project for Powerlite are mostly, Government of Fiji initiated, the entire structure for operation are planned by the respective departments.

Powerlite Fiji Pte Limited – Project status / Challenges

- Energy sector comprises of various different technology and all have its own advantages and disadvantages.
- Delivery of the service to the area where the desperate need for energy required is very difficult to achieve... in terms of transportation, excess to site.
- Technology is improving and the world is moving towards digitalization, hence, demand for Energy is also increasing. The under privilege community are not able to afford the cost of production for these energy sources.
- Funding for new ideas and proposal is a challenge that we cross every passing day.

Thanking you

Powerlite Fiji Pte Limited
