Project Title: Provide support to the European Union Pacific Technical and Vocational Education and Training in Sustainable Energy and Climate Change Adaptation (EU-PacTVET) project

A. Project Description

The European Union Pacific Technical and Vocational Education and Training (EU-PacTVET) project is component 3 within the broader Adapting to Climate Change and Sustainable Energy (ACSE) programme. The project builds on the recognition that energy security and climate change are major issues that are currently hindering the social, environmental and economic development of Pacific-African, Caribbean and Pacific (P-ACP) countries. The EU-PacTVET component is to complement the climate change adaptation and sustainable energy actions on the ground, and to reinforce the potential for green growth, including the introduction of systematic, regular and standardized training at technical institutes and colleges throughout the Pacific, where the next generation of tradesmen and women can learn about climate change adaptation techniques, sustainable energy technologies and their applications. The Pacific Community (SPC) through its Geoscience, Energy & Maritime (GEM) Division and The University of the South Pacific (USP) through its Pacific Centre for Environment and Sustainable Development (PaCE-SD) are partnering to implement the €6.3 million across 15 P-ACP countries. The project commenced in August 2014 and will cover a period of 71 months.
